

Report of website project

1.Introduction

Web Project is the project undertaken as a mandatory requirement for the course "Frontend" that is being conducted mutually by SDU in Almaty,Kaskelen. The aim of the course is to provide a distributed environment to develop websites. In this course we have to develop the Website in teams.Also we should sell it. But I hope that we will make this Project on time.

1.1.Purpose of this document

In this document there is overall description of the Web Project. It includes what I did. There is also description of the work experience gain from this project. Whole description of the designing face and cost is included in this document.

1.2.Scope

The project is aimed to provide a central place for organizing, planning and tracking projects that are developed in a distributed environment. It therefore is a web application that should be compatible with majority of browsers to provide user friendly Interface for project administrator, project leaders and project members working far apart all around the world.
